NATIONAL
GEOGRAPHIC

There are now 6.8 billion people on the planet.

Together we consume
1.4 Earths' worth of
resources per year.

If everyone consumed like
Americans, we'd need
5.4 Earths to sustain us.

If Americans consumed like the:

British 3.1

South Africans 1.4

Argentines 1.2

Costa Ricans 1.1

Indians .4
