

Creating a system for building low carbon economy in Seferihisar

cittaslow

Seferihisar

Reconnecting City with the Universities

SEFERIHISAR

- scientific information necessary to develop and implement projects
 - research opportunities
- a chance to benefit from academic literature
 - students as volunteers

- a chance to reconnect to the society
- an opportunity to convert theory to practice
 - a city as a lab to study
- a chance to be the first in Turkey to implement projects that are first in Turkey

UNIVERSITY

Solar Powered Bicycle

- Izmir University of Economics – Industrial Design Department
- Built to assist the driver
- Can also be used as bicycle-taxi

Solar Powered Bicycle

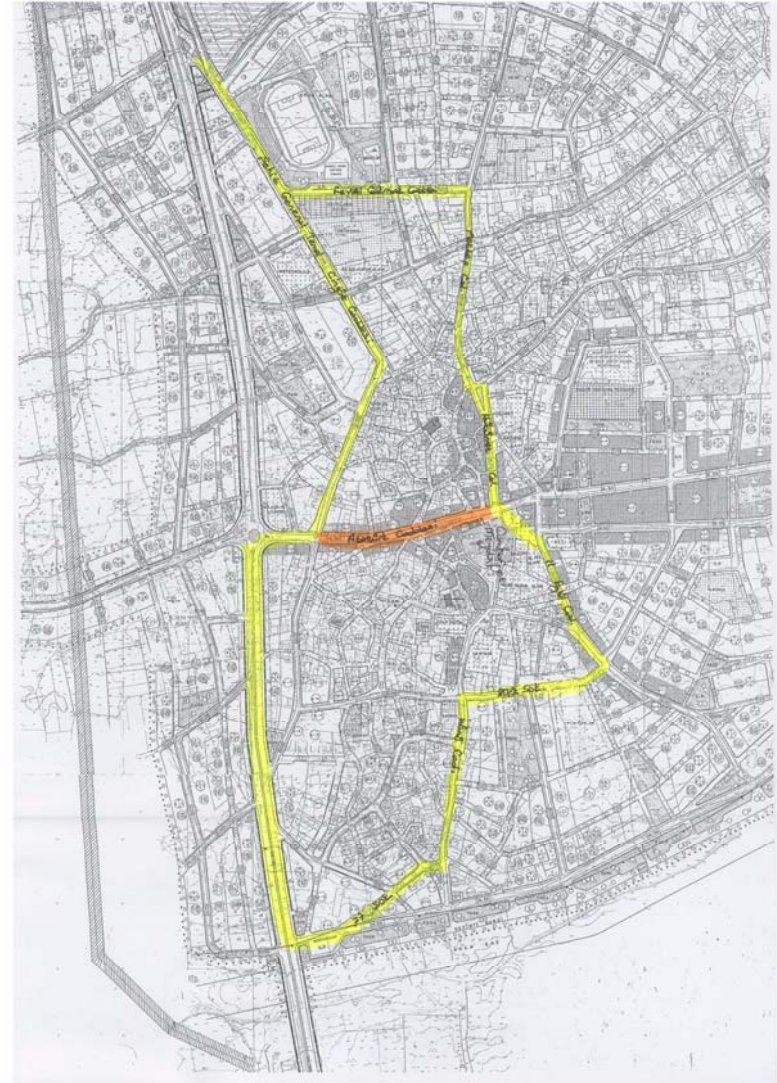

Solar Street Lighting

- Istanbul Technical University
- Lighting project is being prepared for whole Seferihisar
- Sığacık has been selected as pilot area and 56 lamps will be placed in 2010

Transportation Master Plan

- Izmir High Technology Institute – City Planning Department
- Designed to reduce carbon emission
- Main boulevard of Seferihisar has been selected as pilot area and will be engineered for pedestrians

Thank you

M. Tunc SOYER

Mayor of Seferihisar
