Dear Date Movers,

It's been a quiet time on our end in August, in the wake of Earth Overshoot Day. As the new school year kicks in, we're excited to be back on deck and are looking forward to some exciting projects going forward.

We're proud to announce that more than 1,800 members have joined #MoveTheDate Solutions community, contributing more than 500 solutions! A warm welcome to all of you who joined recently. And a special shout-out to all the students – and some teachers – who posted solutions in **Léon, Mexico!**

Today, we announce the first #MoveTheDate Solutions contest:

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

-
2. We, at Global Footprint Network, will take a close look at the 5 solutions **which receive the highest number of thumbs-up and comments.** From those, we will identify the winner based on its potential to #MoveTheDate.
3. The winning solution will be promoted on the map, as well as in our newsletter **to half-a-million subscribers** and on our social media channels.

THE FINE PRINT: Our goal is to give visibility, with your help, to **solutions that already exist**, meaning they have been implemented, have shown results, and are replicable. Only detailed solutions are eligible to win, meaning they have a precise location, a thorough description, and a picture, video, and/or links to more information about the project. Please keep these criteria in mind as you pick your winning solution. And most importantly, have fun with it!

We can't wait to see what solutions emerge by September 22. In the meantime, happy exploring!

Your #MoveTheDate Solutions Team

EXTRA: An "Education, training" subcategory was added to all categories. Feel free to go back and edit your solutions to click that tag if needed.
